

Group Projects introduction - Part III

CS-A1153 Project – Designing a Relational Database

24 May, 2022

Designing a Relational Database: Project Part III

- ▶ In project Part III you will analyse the given data to find patterns and correlations.
- ▶ You will be given data analysis tasks that you will solve using Python pandas library and SQL queries
- ▶ Feel free to perform additional data analysis on the data!

Requirements

The final submission needs to contain

- ▶ Python file containing all the code you used to complete the tasks
- ▶ Documentation containing the answers to the questions. You can use Figures and Tables to represent the results.

Submit these files inside a .zip file to A+ with your group, as before.

The database needs to be in working condition on the virtual server so that the assistants are able to test it.

The deadline for submitting the Project Part 3 is on **Monday, 6 June 2022 at 18:00**.

Late submissions will be accepted until Monday, 13 June 2022 at 18:00 with up to 50% penalty on grading.
